

Stuff You Don't Learn in Engineering School

Guest Speaker Carl Selinger

Thursday May 23rd – 9:00 AM – 12:30 PM

Sponsored by the New England Section's *Emerging Professionals Group*
3 PDH

Carl Selinger, author of *Stuff You Don't Learn in Engineering School*, will discuss the essential, non-technical skills that are required of transportation professionals to complete successful projects while enjoying a rewarding professional career and personal life. These abilities are often overlooked and not taught, but are a necessary complement to technical expertise. An overview of a dozen important soft skills—including decision-making, managing time & setting priorities and others—will be followed by more detailed discussion. The seminar will be interactive and provide practical advice to improve projects and work more effectively with others.

Carl Selinger had a forty-year career in transportation engineering and was Adjunct Professor of Civil Engineering at The Cooper Union, teaching transportation planning for over 30 years. His book has been a globally published trade best seller. Carl is a lifetime member of ITE.
