

Rural Transportation in New England: A research program by NETI

by
Matt Coogan, Director of the New England Transportation Institute

Mr. Coogan will be presenting information about the new three-year NETI program to investigate rural transportation in New England. The Institute will be examining; 1) Issues of rural mobility, 2) Issues of connectivity of the system for rural residents, 3) Issues of rural transportation safety, and 4) the role of transportation infrastructure in rural settlement patterns. This research has received a grant from SAFETEA-LU, a federal government sponsored bill for transportation in the United States.
